

1922
From the early 30s we picked up eggs and delivered feed to various producers in Midway , Charleston and the Canyon.

For many years we picked up daily and delivered them to the Utah Poultry in Provo. We had some sixty plus cases daily and on Mondays, Wednesdays and Fridays we had upwards to 140 cases To 1958

An interesting note : For several^{years} the Utah Poultry shipped a railroad car of eggs to New York each day and because they were fresh(day old) they received a premium price. So the Poultry Ass'n paid an extra one cent a dozen for eggs delivered daily.

Don L. Hicken

from the early 30s we picked up and delivered into various

products in Midway, Charl. from and the Condon.

For her years we picked up daily and delivered them to the local

Police in Grove. What was some time also came daily and

some of the things we had to take to the 100 yards

An interesting note : For several years the local shipyard a

number of cars to New York and as we because they were

Asa's said an extra one sent a good for signs delivered daily.

Membership in the AMA offers you the opportunity to participate in the ever-changing world of medicine. The AMA provides a forum for debate. And, ultimately, membership is a reflection of your concern and commitment to the quality of medical care in America.

As a member, you'll find that the AMA is the one organization interested in every single aspect of your life as a physician: the scientific, the social and even the political aspects of your career.

The AMA's activities cover many facets of greatest interest to you: publishing scientific data; providing access to information; defending our interests before the public, the courts and the Congress. Most important, the AMA binds us together as a community of physicians who share a common goal: the enhancement and prolongation of life.

To that end, the AMA is also an advocate — often the only advocate — on behalf of patients.
